

Ukraine labs – threat reduction or...

February 3, 2023

Late on the night of February 1, User “Kanekoa the Great,” who revealed the [Google Leaks](#), revealed something else. Shortly after Russia began its “special military operation” in Ukraine, *CNAV* heard rumors of biological weapons development facilities in Ukraine – with American funding, and under American direction. Now “Kanekoa the Great” asserts he can prove precisely that. Moreover he linked to another thread that appeared two days before, offering further evidence. (That evidence came from a user who won reinstatement in Elon’s Grand Mass Liberation of Twitter.) The two threads suggest that the frantic “support” of Ukraine is a vain attempt to hide the establishment of those biological weapons development facilities. They further suggest that Vladimir Putin began his operation, in large part, to seek out and expose those facilities.

The strongest evidence against these allegations are the assurances by American embassy staff that these are “threat reduction facilities.” Is that a distinction without a difference? You decide.

Ukraine bio-weapons – the background

On March 7, 2022, *CNAV* published [this compilation](#) of Twitter tweets and YouTube and Rumble videos detailing Ukraine bio-weapons rumors. The discussion began on February 24, 2022, the very day the Russian Army first moved into Ukraine. *Veterans Today* [carried one such rumor](#); a site calling itself “Rupreparing” [carried another](#).

Then a Twitter user calling himself WarClandestine posted this thread:

1) HOLY SHIT! I think I may be onto something about [#Ukraine](#).

Zelensky said the Russians are firing at “military installations”. How broad is that term?

I am seeing speculation that could include US installed biolabs.

At first I was like no way.

Then I started digging. pic.twitter.com/tm72HFAXNK

— Clandestine (@WarClandestine) [February 24, 2022](#)

3) Okay so we are studying the world’s most deadly pathogens at Russia’s border. It’s just for defense. Not that big of a deal right?

WRONG. I didn’t know this until today, but Russia has been accusing US of creating “bio-weapons” at their border. WHAT!<https://t.co/owhDlfl3sz>

— Clandestine (@WarClandestine) [February 24, 2022](#)

5) DO YOU ALL KNOW WHAT THIS MEANS?!

China and Russia indirectly (and correctly) blamed the US for the C19 outbreak, and are fearful that the US/allies have more viruses (bioweapons) to let out.

THIS IS MASSIVE. Yet I’m disturbed that I had didn’t known about this 4 months ago.

— Clandestine (@WarClandestine) [February 24, 2022](#)

7) Reportedly Kiev has seen missile strikes as well. At their airports and military installations.

Kiev is also on the western side of Ukraine. Also a city the US GOV have confirmed the US have built biolabs in. <https://t.co/bBL1JGiqEg>

— Clandestine (@WarClandestine) [February 24, 2022](#)

9) Yes, I know he targeted airports and military capabilities; but if Putin really believes, as his admin has stated publicly multiple times, that the US are creating bio weapons at Russia’s borders, then this entire situation could be WAY bigger.

<https://t.co/SL3wZV9hfl>

— Clandestine (@WarClandestine) [February 24, 2022](#)

For all of this to make sense, you must be privy to the reality that the US NIH did indeed create C19 in Wuhan. Which has been largely accepted as the reality and confirmed in the emails between Collins and Fauci.

I broke down their official NIH emails released by Congress 

<https://t.co/EbKtpCn2ZP>

— Clandestine (@WarClandestine) February 24, 2022

Here's an overlap of reported missile strike locations and the biolab locations. Since the top map was made, more missiles hit Lviv as well.

It certainly appears Putin is targeting the cities and locations with [#USBiolabs](#) present.

He is 100% going after the alleged bioweapons. pic.twitter.com/25pRod0uiu

— Clandestine (@WarClandestine) February 24, 2022

Twitter's Trust and Safety Team suspended WarClandestine's account on the strength of that thread. Many expressed skepticism of his account – but the skepticism amounted to a parsing of definitions. See, for example:

The US NIH funded gain of function research in a civilian Wuhan lab. By your definition is that a US bioweapon research lab? The fact it's on Chinese soil operating by Chinese citizens and marginally funded by US. Also does gain of function research = bioweapons lab?

— R_Bizzle (@RBizzle7) February 24, 2022

Someone else accused WarClandestine of making it up to support Russian military action, which this user regarded as illegitimate.

You were saying?

— Clandestine (@WarClandestine) January 28, 2023

How is it illegitimate?

I guess you support all the "legitimate" invasions by NATO right?[#USBiolabs](#)

— Albert   [#IWillNotUseCBDC](#) (@AlberRom) January 28, 2023

Lol if Twitter existed back then you'd be there cheer leading the Iraq War. We know your game state department. Get better memes cupcake. They're getting stale. Are you paid by the number of posts instead of hourly? That's proly why you spew so much gibberish

— xKrazyBumx (@xKrazyBumx) [February 1, 2023](#)

Note that the other user replied immediately to the first tweet in the thread. Now note the eleven-month hiatus between that tweet and WarClandestine's reply. Clearly Twitter suspended WarClandestine, and then when he got his account back, he started the argument all over again.

CNAV provides the other reply tweets to WarClandestine's original thread, for review:

Isn't this what David Martin has been saying all along dating back to the 1990's

However, I hadnt considered that the situation there now might be connected to these labs. Research, research, research leads to more knowledge. I love research so yes. I knew.

— Graelwyn ❤️❤️❤️#FBPE (@Graelwyn) [February 24, 2022](#)

A simple question. Why is Russia actually invading Ukraine? The main reason behind the invasion is.....?

— DarkKnight (@iamshinerk) [February 24, 2022](#)

The United States Embassy in Ukraine called these labs "threat reduction assets."

Beginning on March 3, 2022, confirmations began to roll in. These tweets give a good sample:

I will add that there is no strong evidence of U.S. funded "bioweapons" research in Ukraine. But the U.S. embassy in Ukraine lists biological "threat reduction" laboratories, similar to the ones the U.S. funded in Wuhan. The readers can draw their own conclusions.

— Kyle Becker (@kylenabecker) [March 6, 2022](#)

On the list of pathogens to be destroyed, there were none listed for coronaviruses that suggest deadly gain-of-function research as a possibility.

— Kyle Becker (@kylenabecker) [March 6, 2022](#)

The general did claim that the Ministry of Defense will bring forth more "analysis" to back up its biological weapons research claims.

The US Embassy in [#Ukraine](#) has just deleted from its website all documents about 11 Pentagon-funded biolaboratories in Ukraine. I have published all these documents (now deleted by the Embassy) here <https://t.co/Odc0ermmZe> and in the thread below <pic.twitter.com/benFmDwgul>

The latest threads

WarClandestine left this thread on January 29:

2) Let's go back to when and where it all began.

Flashback to 2005. Then Senator Obama and Senator Lugar visited former Soviet biological and chemical facilities in Ukraine, and established the US Deep State roots in Ukraine.

To "counter bioweapons". <https://t.co/wyQ0ZngFnB>

— Clandestine (@WarClandestine) [January 30, 2023](#)

4) But when the US does "defensive gain of function/directed evolution" research, it's not bioweapons.

In 2005 [@washingtonpost](#) admits that "anti-plague" research results in the production of "highly lethal pathogens" aka "bioweapons".

Seems their tune changed in 2022. <pic.twitter.com/q8H4ff26BI>

— Clandestine (@WarClandestine) [January 30, 2023](#)

6) Obama opened the floodgates for the Deep State. Created biological weapons programs with the Ukrainian government, and established connections for US oligarchs to build biolab companies in the lawless land of Ukraine.

Companies like Biden's Metabiota. <https://t.co/eUwOO6ant4>

— Clandestine (@WarClandestine) [January 30, 2023](#)

8) Nuland, who spilled the beans on the fear of "Russian forces getting their hands on the biological research in Ukraine", engineered the Color Revolution in Ukraine.

They started a civil war, then picked their puppet to run the government, creating a Deep State proxy. <pic.twitter.com/mid0urxPcm>

— Clandestine (@WarClandestine) [January 30, 2023](#)

10) So the reason why all of our tax dollars are in Ukraine, is because Ukraine is a Deep State proxy, controlled by the ruling families of the DNC/Soros.

They are trying to protect their assets/secrets in Ukraine.

Most consequential of which is their biological activity. pic.twitter.com/ZE9zAgySSK

— Clandestine (@WarClandestine) [January 30, 2023](#)

12) The reason the [@FBI](#) and [@DHSgov](#) went full Orwell and weaponized Big Tech to censor all reporting on the Biolabs in Ukraine, is because intel community is compromised by the Deep State.

The Deep State who can't let people find out about their pathogen production scheme... pic.twitter.com/U9iEuQ8Ybn

— Clandestine (@WarClandestine) [January 30, 2023](#)

14) The reason Zelensky ordered the Ukrainian Ministry of Defense to destroy all State documents affiliated with US biolab companies "Metabiota and Battelle"... the day that missiles started flying (2/24/22)...

Is because he knew Putin was looking for the bioweapons. pic.twitter.com/vy4aliRpxw

— Clandestine (@WarClandestine) [January 30, 2023](#)

15) Big Pharma, MSM, Big Tech, the Intelligence Community, Zelensky, WHO/NIH, and Deep State politicians; are all working together to accomplish the same goal...

To cover up the criminal biological weapons production in Ukraine.

All the entities who happened to benefit from C19.

— Clandestine (@WarClandestine) [January 30, 2023](#)

17) Tanks, jets, weapons, equipment, \$100+ billion in taxpayer funds, the lives of the Ukrainian people...

All worthy sacrifices in the eyes of the Deep State. Whatever it takes to cover up their bioweapons production.

WW3 already started. C19 was the first weapon fired.

Liz Wheeler asked him for an interview.

Would love to interview you about this. DM me?

— Liz Wheeler (@Liz_Wheeler) January 30, 2023

Presumably she got that interview, because she produced this episode about “a conspiracy theory about Ukraine.”

Watch Video At: https://youtu.be/JN7GcQtba_4

Here we have some back-and-forth, including one user who wanted to argue about “conspiracy theorists”:

I like how you keep finding more, fitting the puzzle pieces together and present the well documented conclusions. Excellent work.

— Renee M. (@1114Fuller) [January 30, 2023](#)

Unfortunately, we have to endure such unspeakable bullshit again, since Elon Musk lifted all restrictions on the conspirators! Who believes such trash and who will read that!?! 🤢👎👎👎

One user, apparently an American, wondered forthrightly whether America was aiding the wrong side:

Was wondering today if we have been on the wrong side of this Ukraine thing from the start.

We have been lied to so much by the media, why not lied to on this?

The Ukrainians posting counter arguments...how do you you have the whole truth about what's going on?

— Free Man (@mschrammbo) [January 30, 2023](#)

Another user expressed what looks like skepticism. But bear in mind the Ukraine flag he flies as part of his account name:

Given both of your opening statements are false showing a lack in basic journalism standards (\$15bn financial aid and not \$100bn + and the US hasn't yet approved providing jets) its safe to assume reading the rest of the your thread is going to be a complete waste of my time.

Analysis

The problem with “conspiracy theories” is that the “intelligence take” from social media looks the same. This holds whether the theory is true or false. But the problem for those who dismiss such theories as false, is that too many of them have proved true. The Twitter Files and other such releases have in fact proved the truth of the oldest conspiracy theory of the Internet. Which is that legacy media, and social-media moderators, really do preferentially suppress content that questions leftist authority. At the same time, these same organs accuse others of offenses varying from misprision of the news, to treason.

The Russian Federation has long held that Ukraine had biological weapons development facilities in it. We know from the [FTX revelations](#) that Ukraine has been a money laundry for leftist causes, including the Democratic Party. (But don't forget [RINOs](#).) More to the point, the United States Embassy in Ukraine *did* avow having “biological threat reduction facilities” in Ukraine. When does such research go beyond “threat reduction” toward outright weaponization of viral or microbial life? This brings up another problem: today nearly all the authorities tasked with making such a distinction, stand accused of nefarious behavior.

This, then, is what the House of Representatives should investigate, now that a different Party conference has taken it over. Let those embassy and State Department personnel make their technical distinctions while seated at a green baize table. That, more than “vax mandates,” deserves investigation – immediate investigation.
