Two different sources have put forth theories that the COVID vaccine preparations (not true vaccines) are actually a death lottery. To be more specific, a COVID vaccine will have three kinds of effect on you, with roughly even chances. These two sources allege that *all* vaccine makers are under orders to distribute *three different preparations by lot*. They further allege that each type of preparation has a different effect – or none.

What is the meaning of a COVID vaccine death lottery?

To be more specific, Mr. Mike Adams of *Natural News* alleges that a COVID vaccine will have one of three effects on anyone who takes it. It will either:

1. Kill you, in a time frame varying from immediate (48-hour) to chronic effect, killing you by inches over ten years,
2. Debilitate you, chiefly mentally through multiple micro-strokes for lack of a better term, or
3. Have no effect on you at all – because it is a saline placebo.

Mr. Adams [lays out his evidence](#) on *Natural News* and also has an eighty-minute podcast detailing his evidence.

Here Mr. Adams tells why he suspects that the distribution of fatality, injury, and no-effect *is not accidental*.

Interestingly, this appears to coincide with the statistical analysis of covid vaccine lot numbers, where roughly one-third of the lots are associated with heart attacks and deaths, another third are associated with injuries (but not death), and a final third appear to be harmless (suspected to be saline).

Today (17 January), Mr. Reiner Fuellmich offers more specific details about specific COVID vaccine lots having different effects.

Mr. Fuellmich embedded this video in [this page](#) at the Lew Rockwell site. The title:

New Findings... Enough to Dismantle the Entire (VAX COVID) Industry!

What this means

CNAV tips its hat to Mr. John Anthony of Sustainable Freedom Lab for directly apprising us of the second video. In an email to CNAV he writes:

This shocking video describes how data now shows that everyone is not getting the same Pfizer or J&J vaccine shots. Some are lots resulting in 3000X the death rate of others. Worse, the drug companies are conducting experiments within experiments. Even your family doctor has no idea what version they are jabbing.

Thus Mr. Anthony identifies Pfizer, Inc. and Johnson & Johnson as the chief offenders. But CNAV sees no reason to dismiss Moderna or AstraZeneca PLC (UK) as suspects.

Recall that BBC Presenter Lisa Shaw, eager to signal her virtue of compliance, accepted the AstraZeneca COVID vaccine. Within five weeks she had died. In a development that perhaps AstraZeneca PLC did not anticipate, she came to autopsy. Final Anatomical Diagnosis: multiple cerebral thromboses (clots), as a complication of the COVID vaccine.

CNAV has suspected something wrong with the COVID vaccine for a very long time, since before the American mandate. We now have two different sources, all alleging that the administration of this “vaccine” is a death lottery. The evidence directly implicates two American drug companies and *does not* exculpate the third American company or the British firm.

Use of the vaccine in specific cases

CNAV has direct knowledge of one person (whose name CNAV will withhold) who accepted the COVID vaccine. Today he is going at least partly blind in at least one eye. So the same clots that “fried” Lisa Shaw’s brain could be “frying” this patient’s retina(e).

Regular readers will recall Gavin Newsom's abrupt disappearance from public life. He made a big show of getting first the vaccine and then a booster. But after he took the booster, he vanished, reappearing only at the Ivy Getty wedding. His disappearance, and the duration of it, suggests an embarrassing medical problem his staff sought to conceal. At first *CNAV* thought it was Bell's palsy. But he does not show "Bell's facies" today. More likely he *lapsed into a coma* and could appear only after he recovered.

Perhaps – just perhaps – he was supposed to get the saline placebo both times. *But somebody goofed.*

The more reason for *CNAV* to repeat its long-standing advice:

| Do not. We repeat. Do not. Take. The jab. Under. Any. Circumstances.
