

# Fauci, gain-of-function research, and biowarfare

---

 [conservativenewsandviews.com/2021/09/09/accountability/executive/fauci-gain-of-function-research-biowarfare/](https://conservativenewsandviews.com/2021/09/09/accountability/executive/fauci-gain-of-function-research-biowarfare/)

September 9, 2021

The narrative of the outbreak of Severe Acute Respiratory Syndrome Corona-Virus No. 2 (SARS-CoV-2) out of China and Italy and to the world at large, has always featured logical inconsistency and out-and-out fantasy. Governments everywhere treated the Corona Virus Disease of 2019 (COVID-19) as if it were double-digit lethal. Yet the story they told of its origin made zero sense in light of the hype. And we now learn that SARS-CoV-2 *did not* originate in the wild. Anthony S. Fauci, M.D., directed gain-of-function research, then gave his prototypes to the Chinese. He then lied about it – twice – to a committee of the United States Senate. A fresh report on activities with which he connected himself, has definitively given him the lie. But a more careful examination of the facts reveals a dangerous mind-set that goes far beyond the sins of one misguided physician.

## Who is Anthony S. Fauci, M.D.?

---

Anthony S. Fauci, M.D., has directed the National Institute for Allergy and Infectious Disease (NIAID) for decades. He takes the credit for discovering the Human Immunodeficiency Virus and getting a patent – a *patent!* – on its common treatment. But Bradlee Dean, one of *CNAV's* regular content sharers, exposed Fauci as a con artist. Darrell L. Castle further exposed Fauci as a scientific plagiarist and a Frankensteinian “mad scientist.” Joan Swirsky, in April of 2020, “smel[t] a rat.”

The narrative of the origins of SARS-CoV-2 ran thus. A hapless resident of Wuhan, China, bought a bat at a “wet market” in that city, took it home, and made soup out of it. He then sickened and died. But not before the virus that killed him, infected others. The infection spread like wildfire and prompted authorities to lock the city down. Too late! An infected passenger flew out of Wuhan – and landed in the United States. To say nothing of several Italian guest workers who caught the infection and literally brought it home. The rest, to paraphrase the cliché, is history.

## The real history of coronavirus

---

But it is a *false* history. CNAV has long suspected that Dr. Fauci, during the Obama administration, directed and obtained funding for gain-of-function research on bat coronaviruses at his Institute. *Gain-of-function research* is a euphemism for *weaponization*. The man then holding office as President, Barack H. Obama II, found out about the Fauci program. He then decided, not exactly to terminate it, but to *transfer* it. So on his orders, Fauci transferred his prototypes to the Wuhan Institute of Virology and/or the Wuhan University Center for Animal Experiment. A non-government, non-profit organization calling itself EcoHealth Alliance obtained further U.S. federal grants and financed further research at one or both of these laboratories.

How the virus broke containment, none can say for certain. The most common rumor is the most prosaic one imaginable. Three or four infected laboratory workers sought treatment from someone other than their official infirmarian. They gave it to him and/or his staff, and he/they gave it to the hapless residents of Wuhan. The disease then leaped to the airport and thus spread around the world. An obvious question arises. Did those personnel really break protocol in a regimented country like the People's Republic of China? Or did Chinese authorities *count on* their doing this, or even *order* them to do this? Such a method would create a release pathway they could later "plausibly deny."

## Fauci v. Paul

---

Senator Rand Paul (R-Ky.) specifically asked Dr. Fauci about gain-of-function research before the committee on which he sits. Fauci denied doing such research and fell back on the defense that Big Cheese Doctors always use when mere laymen – blobs of humanity – dare question their judgments, decisions, or actions. "You don't know what you're talking about!" he indignantly retorted.

The problem: RedState.com was already suing the NIAID under the Freedom of Information Act. All they got was the Big Stall. But another organization was also suing: The Intercept. On Labor Day (6 September 2021), The Intercept broke the story. They had obtained *nine hundred documents* from Wuhan and elsewhere, showing the trail. And on that day they released those documents to the public. They prove incontrovertibly that Anthony S. Fauci lied to a Senate committee. Senator Paul has already made a "criminal referral" on the matter. One cannot expect any action – not from Merrick Garland, an even more partisan Attorney General than Eric H. Holder, Jr. (See also this review by TownHall.com. See also here, here, and here.)

'Anthony Fauci lied to Congress': Investigation by The Intercept reveals U.S. funding for gain of function research at the Wuhan Institute of Virology <https://t.co/Wr08jQstw0>

— Twitchy Team (@TwitchyTeam) September 7, 2021

Instead the only way to stop, and punish, this activity is with your vote. But before you can vote intelligently, you should have all the facts.

## How does a man like Fauci get into, and through, medical school and residency? (And what happens to him there?)

---

The facts begin with something Americans must realize about established, conventional medicine in the United States and elsewhere. Ever since Abraham Flexner exploded the old apprenticeship system for medical education in the United States, medical education became an institution. And that institution fostered, bred, and taught an appalling arrogance. The only reason society at large tolerates such arrogance is because people believe in modernity. They believe that “modern science” can cure all ills. Even to win acceptance into medical school requires a grueling study ethic that cuts the student off from the usual social life. And no matter how often interviewers try to find the “well-rounded candidate,” they always end up selecting a class of grad-grinds. And grad-grinds, as all their fellow students know, are among the most arrogant sons of female dogs they ever met.

Arrogance got them into medical school, and arrogance gets them through it. Especially when Anthony S. Fauci went to medical school, hours at study, in class, in the laboratory, and on teaching wards were long. As they likely still are. When postgraduate training starts, the problem gets worse. It got so bad that in 1992 a young “resident” had a young woman die under his care. He missed a crucial clinical sign because he was half asleep from working too many hours straight. The problem was that she was a New York State Assemblyman’s daughter. That Assemblyman immediately legislated the first work limits for graduate and postgraduate training.

### Arrogance breeds arrogance – and entitlement

---

But that happened decades after Anthony S. Fauci had gone from “resident” to attending. Furthermore, Dr. Fauci is a product of a pre-Medicare system, when “residents” earned a wage that could never suffice. “In my day, I sold my blood for toothpaste money!” your editor, going through medical school, heard from more than one scornful attending. No doubt Dr. Fauci did the same, or knew someone who did.

From this deadly combination of pre-existing arrogance and deprivation, comes worse arrogance, and a sense of entitlement. And the higher one rises in conventional medicine, the worse these traits get. Now have a look at Anthony S. Fauci. *Can you wonder that he acts as if he were Chief of All Chiefs of Staff of all hospitals in these United States?* He is the product of his environment, and that environment is toxic.

Furthermore, out of that sense of entitlement comes a tendency to grab credit and money wherever one can. Even if that means stealing a colleague’s work and *even deriving a patent from it*. As Mr. Castle related above, Anthony S. Fauci so treated Dr. Judy Mikovits, the *actual* discoverer of HIV.

## The Wuhan Documents

---

We come now to the documents from The Intercept, that detail the weaponization of SARS-CoV-2. Here is one [key document](#) describing some of the research. Recall that The Intercept has hundreds more.

That document alone describes:

- Screening thousands of samples from live, wild bats,
- Screening people who work with live animals for a living, and
- Specific work with “humanized” mice (mice with human genes) at the Wuhan University Center for Animal Experiment.

### Easy Plugin for AdSense by Unreal

We see all the prerequisites for weaponization: gather samples and work with them in an “animal model” with human features.

The Intercept tells us that the first grant came in 2014 and ran for five years. The grant won renewal in 2019 – but the Trump administration suspended the grant in 2020.

See also this [other document](#) from The Intercept: “Understanding the risk of zoonotic virus emergence in emerging infectious disease hotspots in southeast Asia.” Note the date of the award: 28 August 2020.

## **Who is Peter Daszak?**

---

Now turn away from Anthony S. Fauci to his partner in, for lack of better terms, crime – or treason. Peter Daszak, Ph.D., heads the EcoHealth Alliance. They [describe themselves](#) as a group dedicated to *preventing* pandemics. But do they pursue prevention – or instigation? To answer that one must first ask: Whiskey Tango Foxtrot is Peter Daszak? [Rumor has it](#) that his father was a Nazi concentration camp guard at Camp Janowska in what was once part of Poland and is now part of Ukraine. As a matter of *fact*, Peter Daszak’s group [has received](#) more than \$40 million in federal grants. And those grants came, not from the National Institutes of Health, but from *The Department of Defense*.

This reminds your editor of a Rod Serling movie script based on Fletcher Knebel’s novel *Seven Days in May*. In a key scene, the executive officer of an “Emergency Communications Control” (EComCon) unit tells a fellow officer,

“You know, Jiggs, it’s funny. We seem to spend more time training for seizure than for prevention. As if the [enemy] already had the stuff [we are tasked to guard] and we had to get it back.”

And Col. Martin “Jiggs” Casey USMC later develops, and gives the President, evidence that EcomCon is part of a plan for a military coup. Its mission: to *seize* broadcast centers and public telephony switches, to control communications. “Emergency Communications

Control"! Get it? Similarly, mightn't the real mission of EcoHealth Alliance be to *cause* pandemics, not prevent them?

## **Fauci and Daszak: s-t-r-a-n-g-e b-e-d-f-e-l-l-o-w-s**

---

*This* is the sort of person with whom Anthony S. Fauci cooperated and cooperates.

As one might expect, Peter Daszak has denied flatly that SARS-CoV-2 leaked from a laboratory. Lay aside for a moment that maybe the virus did not *leak*, but the laboratory director *let it out deliberately*. The fact remains that EcoHealth Alliance was playing with the very fire that broke out. And that Dr. Fauci facilitated this playing with fire, then lied about it. And the lie has caught up with him. As have many other lies on this subject.

## **What happens next?**

---

The next question we must ask ourselves is: what are we going to do about this? Obviously justice demands the following: that

- Anthony S. Fauci, M.D.:
  - Lose his job,
  - Never again qualify to hold office of honor, trust or profit under the United States or any of them,
  - For that matter, never again qualify to hold admitting privileges at any hospital, and
  - Go to prison, *not only* for "lying to Congress," *but also* for *treason against the United States*. (And whether any warden should trust him to run the prison infirmary is an open question!)
- Peter Daszak and his EcoHealth Alliance come under investigation seeking to know:
  - What happened to the \$40 million in Pentagon grants, and
  - Their ties to the People's Republic of China.
- And: that Joseph R. Biden and Kamala Harris *both* be removed from office on impeachment for, and conviction of, treason.

But of course, this world not being fair, that isn't likely to happen. Perhaps only Jesus Christ will serve justice when He shall come again in glory to judge both the quick and the dead.

But the continued security *and health* of the people of the United States demands that we stop taking advice from the likes of Anthony S. Fauci and Peter Daszak! That also includes making a campaign issue, in the next Midterms, of Dr. Fauci continuing in office and Dr. Daszak continuing to get grants.

## **How did we get to be such malingering sheep?**

---

The American people must *also* re-examine how they came to harbor a mind-set that would let a Dr. Fauci so bamboozle them. That mind-set is one of fear – blind, mindless fear. The Drs. Fauci and Daszak got away with painting a lurid tale of a Stephen King’s *Stand* scenario *only because the American people were willing to believe it*. The essence of the *Stand* scenario involves a virus with a near-100-percent case-fatality rate, against which most have *no* defense.

*That’s false!* Even with the weaponization Drs. Fauci and Daszak performed, one can *still* fortify one’s body against it. This is why the Mainstream Media want to demonize any effective treatment. They get circulation on the *Stand* narrative, and effective treatments undermine it. Indeed, *Rolling Stone* fabricated a story of people overdosing on ivermectin and clogging the local poison control and emergency centers. *It never happened!* But the real story didn’t break until many leftist politicians and shills trumpeted the story on many social media. And they have yet to apologize.

## **Don’t let this happen to you – again**

---

The American people, and indeed all the world, have come under a biological warfare attack. Anthony S. Fauci, M.D. and Peter Daszak, Ph.D., aided and abetted it. The American people must not give them, or their likely masters the Chinese Communist Party, any satisfaction. Take your vitamin D, your apple a day, your zinc sulfate, and if necessary your ivermectin or hydroxychloroquine, and your chances. Don’t listen to any more besmocked experts. Not after Fauci, Daszak and company have so sullied their reputations.

## **About the image**
