

Globalist Climate Candidate Michael Bloomberg and the Humanitarian Hoax of Climate Change

 conservativenewsandviews.com/2019/11/28/news/michael-bloomberg-globalist-candidate-humanitarian-

November 29,
2019

Michael Bloomberg became a multi-billionaire by understanding global markets. He analyzed the 2020 U.S. presidential political marketplace and concluded three things:

Michael Bloomberg the leftist hero?

- None of the hysterical, radically leftist Democrat candidates can beat President Trump in 2020.
- Joe Biden's political corruption exposed in the Ukraine is irreversible and focuses unwelcome attention on the political corruption of the Clintons, the Pelosis, the Kerrys, and the Obamas.
- The single most successful humanitarian hoax and galvanizing political issue of our time is climate change.

Michael Bloomberg bets on climate change

So what does astute multi-billionaire globalist Michael Bloomberg do? He announces himself the climate candidate of the 2020 presidential election. In a November 26, 2019 [article](#), "Billionaire Buys 'Climate Change' on Google," Brian Kahn reveals how Bloomberg plans to spend \$1 billion of his personal fortune to buy Google ads that will reinforce his image as the climate candidate.

It is a brilliant political move by a brilliant market analyst because anyone opposing Bloomberg is seen as opposing climate change. The advertorial message is that Bloomberg will deliver the world from the catastrophic threat of climate change, so a vote for Bloomberg is a vote to save the planet.

Bloomberg is betting that the galvanizing message of climate change is powerful enough to overcome any anti-Semitic objections to his candidacy.

Oh, really? A closer look

Let's examine what it means in real terms, in real life, to the lives of real voters if this self-described climate candidate wins in 2020.

We begin by debunking the foundational premise of Bloomberg's political ads: Climate change is the greatest challenge and threat to life in the 21st century.

I have written three articles on the humanitarian hoax of climate change.

The Humanitarian Hoax of Climate Change

The first, [The Humanitarian Hoax of Climate Change](#), introduces the purpose of the con. (See also [here](#).)

| [Humanitarian hoax: climate change](#)

The Humanitarian Hoax of climate change is the whopper of the 21st century. It is a deliberate political scheme to transfer the wealth of industrialized nations (particularly the U.S.) to non-industrialized nations. It is globalized socialism where the assets of productive nations are transferred to non-productive nations. WHY?

First create the percept of a problem

The answer is found in understanding the nature of the hoax which has two parts. First, it is necessary to focus attention on the fabricated specter of catastrophic climate occurrences that will devastate the planet to deflect attention away from the actual threats to America from a nuclear Iran, the spread of Islamic terrorism, and the economic instability of a an unsustainable trade deficit.

Then offer a draconian solution

Second, Obama's long term plan of an internationalized globalized world requires the de-industrialization of America. His crippling energy restrictions were designed to weaken America's defenses by destroying America's energy industry, making us more dependent on foreign energy, and increasing our trade deficit to unsustainable levels. Obama actively supported the punitive anti-American Paris Climate Agreement deceitfully presented as the premier humanitarian effort to save the planet from catastrophic climate change. Obama disguised his crippling rules and regulations to destroy U.S. energy as altruism and a humanitarian concern for the planet.

Gore's laughable screed

In a laughable outburst Big Footprint former Vice President Al Gore attacked President Donald Trump. Gore accused him of "tearing down America's standing in the world" by withdrawing from the [Paris climate accord](#).

| [Paris Agreement: Climategate 3.0](#)

Only in the eyes of a deceitful globalist would withdrawing from an anti-American agreement be destructive. Gore actually said with a straight face on NBC's Today Show,

| The climate crisis is by far the most serious challenge we face.

Al Gore's *Inconvenient Truth* is in fact a very "Convenient Lie."

The Riddle of Climate Change

The second article, [The Riddle of Climate Change](#) (see also [here](#)), exposes the marketing of the convenient political lie.

| [The Riddle of Climate Change](#)

More doomsday fear mongering features in a [Breitbart article](#) discussing David Wallace-Wells' new book *The Uninhabitable Earth: Life After Warming*. That book predicts 100 million climate refugees by 2050. SERIOUSLY? Wallace-Wells defends his cataclysmic predictions saying that he worked from the worst warming scenario presented by the United Nation's Intergovernmental Panel on Climate Change (IPCC).

From the horses' mouths: Kevin ("Travesty") Trenberth and Mikhail Gorbachev

A stunning Forbes article published 2.5.13 titled, [In Their Own Words: Climate Alarmists Debunk Their "Science"](#) quotes Kevin Trenberth, a lead author of 2001 and 2007 IPCC report chapters, who admits,

| None of the models used by the IPCC are initialized to the observed state and none of the climate states in the models correspond even remotely to the current observed state.

The same Forbes article quotes former Soviet Union President Mikhail Gorbachev. That worthy

| emphasized the importance of using climate alarmism to advance Marxist objectives saying, "The threat of environmental crisis will be the international key to unlock the New World Order."

Gorbachev was referring, of course, to the globalist New World Order of an internationalized world community administered under the auspices of the United Nations.

Debunking the Bunk

My third article, [The Humanitarian Hoax of Climate Change II – Debunking the Bunk](#), reviews the material and explains the efficacy of the lie of manmade climate change. (See also [here](#).)

| [The Humanitarian Hoax of Climate Change II – Debunking the Bunk – hoax 46](#)

[Easy Plugin for AdSense by Unreal](#)

The climate changes, but “manmade” climate change is the deliberately misleading narrative that human behavior is causing cataclysmic changes to the Earth’s climate. The [Climategate](#) scandal exposed the fraudulent “research” that supported its politically motivated claims and exposed the hoax.

The United Nations IPCC goals are unapologetically stated in [United Nations Agenda 2030](#) – the manifesto for imposing the new world order of one world government. The 17 Sustainable Development Goals reaffirm the United Nations globalist stance that planet Earth and its ecosystems are

| our common home and that “Mother Earth” is a common expression in a number of countries and regions.

Note carefully: holding all things in common

This is all Orwellian doublespeak to rationalize imposition of a New World Order of one world government under the auspices of the corrupt United Nations.

| [Christiana Figueres climate manifesto](#)

This article includes testimony by Greenpeace apostate Patrick Moore exposing the lie of “settled science.” He explains how environmental science has been completely co-opted by political science. There is not a shred of credible evidence that manmade climate change exists – but no matter. The truth never stops a determined huckster.

Moore explains:

| When they talk about the 99 percent consensus [among scientists] on climate change, that’s a completely ridiculous and false number. But most of the scientists — put it in quotes, scientists — who are pushing this catastrophic theory are getting paid by public money, they are not being paid by General Electric or Dupont or 3M to do this research, where private companies expect to get something useful from their research that might produce a better product and make them a profit in the end because people want it — build a better mousetrap type of idea.

And so you've got the green movement creating stories that instill fear in the public. You've got the media echo chamber — fake news — repeating it over and over and over again to everybody that they're killing their children.

Climate shaming and fear mongering

Shaming is a powerful tool used and abused by humanitarian hucksters to promote their manmade climate change narrative, and to silence any opposition to their false claims of “settled” climate science.

The manmade climate change hucksters continue to perpetrate their monstrous hoax through fear and guilt. Fear is a powerful motivator for behavior change. If parents can be convinced that catastrophe will strike their children unless they change their own behavior, their guilt will motivate parents to change and the big lie of manmade climate change becomes generational.

The American republic v. globalism

American democracy is the single greatest existential threat to one-world government with President Donald Trump as America's leader. The globalist elite are desperate to stop Trump because if Obama is exposed as a con man it leaves them without their primetime huckster to continue marching America toward anarchy and socialism with his “resistance” movement. The globalist elites who fund the leftist humanitarian hucksters are using them as useful idiots to facilitate climate alarmism and the great humanitarian hoax of climate change worldwide. It is a deliberate plan to create the overwhelming social chaos necessary to impose their own special brand of a New World Order.

Michael Bloomberg, card-carrying globalist

Michael Bloomberg is a member of the globalist Trilateral Commission, the think tank founded by globalist David Rockefeller in 1973 to foster “cooperation” among nations. To fully understand the objective of a globalist one must understand the duplicitous language of a globalist. To a globalist, cooperation means cooperating in the implementation of an internationalized New World Order.

Michael Bloomberg is also a member of the globalist Council on Foreign Relations, another globalist think tank dedicated to the New World Order.

David Rockefeller admits the existence of a conspiracy and his membership thereof

David Rockefeller, former chairman of the globalist Council on Foreign Relations from 1970-1985 stated unapologetically in his *Memoirs*:

Some even believe we [Rockefeller family] are part of a secret cabal working against the best interests of the United States, characterizing my family and me as “internationalists” and of conspiring with others around the world to build a more integrated global political and economic structure – One World, if you will. If that’s the charge, I stand guilty, and I am proud of it.

p. 405

Rockefeller also reveals an interlocking editorial board of the Mainstream Media

We are grateful to *The Washington Post*, *The New York Times*, *Time Magazine* and other great publications whose directors have attended our meetings and respected their promises of discretion for almost forty years. It would have been impossible for us to develop our plan for the world if we had been subject to the bright lights of publicity during those years. But, the work is now much more sophisticated and prepared to march towards a World Government. The supranational sovereignty of an intellectual elite and world bankers is surely preferable to the national auto-determination practiced in past centuries.

David Rockefeller to Trilateral Commission in 1991

What Michael Bloomberg signs onto

Lord Bertrand Russell wrote a book titled *The Impact of Science on Society* in 1952. This book unapologetically describes in chilling detail the intention of the few globalist elites in England and America, including the Rothschilds and the Rockefellers, to impose one-world government as the answer to the Malthusian problem of the earth’s resources being unable to sustain population growth. They want no national sovereignty, no middle class, no upward mobility, and no individual freedoms. The globalist elites envision a feudal binary socio-political system of masters and slaves. In it, they are the ruling elite served by an enslaved population – everyone else is eliminated.

World population needs to be decreased by 50%.

Henry Kissinger

Michael Bloomberg – the modern Manchurian candidate

Michael Bloomberg is a clear and present danger to American sovereignty. His philosophical positions reflect the same condescending aristocratic attitudes of Lord Bertrand Russell, David Rockefeller, and Henry Kissinger. Michael Bloomberg is the climate candidate huckster who champions bringing one-world government to America disguised as altruism. Michael Bloomberg is the candidate of one-world government and the political aristocracy who believe they are superior and entitled to be the masters of the world's population of slaves.

Michael Bloomberg, the 2020 climate candidate, is the personification of the humanitarian hoax of climate change and the man attempting to impose globalism's New World Order. He is the consummate humanitarian huckster presenting himself as America's advocate when in fact he is America's existential enemy. If Michael Bloomberg becomes the 2020 Democrat candidate, the election will be a clash of the titans that will determine the future course and structure of life on Earth.

Donald Trump v. Michael Bloomberg: the main event

President Donald Trump representing the American flag of freedom and national sovereignty vs. Michael Bloomberg representing the globalist flag of one-world government and a return to the feudal totalitarian New World Order ruled by the globalist political elite.

Editor's Notes:

This article also appears [here](#) at [Pundicity.com](#). See also the author's [website](#).

Your editor first broke the Climategate story ten years ago on a now-defunct site. It appears [here](#), courtesy of the Wayback Machine. See also:

- Phil Jones [admits](#) the files of the Climategate Archive are genuine.
