

Radical Leftist Democrat Coup Attempt #5: Election Fraud

September 4, 2020

The radical leftist 2020 Democrat tactical political operating principle is,

 | If at first you don't succeed, try, try again.

The problem, of course, is that for deranged Democrats, that means lying, cheating, and stealing. Let me explain.

Coup attempt 1 through 4

The first Democrat coup attempt against duly elected President Donald J. Trump was Spygate – the Obama administration's false *Russia collusion* narrative. Coup attempt #1 did not succeed.

The next try was the equally fraudulent narrative that accused President Trump of Ukrainian quid pro quo. Coup attempt #2 did not succeed.

The Ukraine deceit led to the third coup attempt. To wit: the spectacle of an illegitimate impeachment as a political weapon to remove President Trump from office. Coup attempt #3 did not work, either.

Then the communist Chinese got into the act and unleashed the fourth coup attempt against President Trump. To wit: the economic bioweapon named COVID19. Even that loathsome coup attempt was not successful.

What were the increasingly desperate, deranged Democrats and their globalist handlers supposed to do?

Coup attempt 5 – voter fraud

Voter fraud – of course!!

The fifth and arguably most egregious coup attempt against President Donald Trump is the current campaign to steal the election from him by declaring Trump's predicted landslide victory in November illegitimate. ILLEGITIMATE???

Yes. Democrats are deliberately prolonging COVID lockdowns to provide the excuse that voters cannot get to the polls. They therefore require mail-in ballots. The desperate Democrats plan to mail ballots to anyone living in the United States including:

- Registered and non-registered voters, dead or alive,
- Citizens and illegal aliens, and
- People who have moved away and are voting in other states.

This will overwhelm the post office with ballots and delay the official ballot count. You get the picture. The Democrat strategy is to delegitimize Trump's anticipated massive electoral and popular victory in November.

Candidates unelectable...

Can't they just field an electable candidate? No, they can't because the radical leftist 2020 Democrat party platform is so unacceptably anti-American, anti-Christian, antisemitic, and anti-family, that the only way they can possibly win is to cheat. The singular benefit of the prolonged Covid lockdowns is that they have provided the American public the opportunity to experience life under radical leftist Democrat rule – and they don't like it.

Of course the Democrats are aware that demented Beijing Joe Biden is not an electable candidate. Indeed he can barely string two sentences together. He cannot hide in his basement forever. Beijing Joe's running mate, radical leftist Kamala Harris is not electable either. So, what is their alternative? Cheat, of course.

... therefore, yet another coup attempt

Instead of fielding an electable candidate, the deranged Democrats plan to:

- Delegitimize President Trump's win, and
- Install House Speaker Nancy Pelosi as acting president until everything sorts out.

Has the United States descended into a third world nation? The Democrats think so. They believe they can steal power by stealing the election. Their "ends justifies the means" mentality is the foundation of every tyrannical regime on the face of the planet. Voter beware!

If Joe Biden steals this election the United States of America will cease to exist as we know it. The radical leftist Democrats currently dominating the party will:

- Collapse the economy, and
- Turn our constitutional republic into socialism.

| Socialism by definition and degree

But wait – there’s more!

After the coup attempt – the fight over the spoils

The noisy radical leftist Democrats are the useful idiots of the globalist handlers who finance their campaigns. Once the Democrats have stolen power, the radicals are dispensable and a liability that their financiers will eliminate. Then the globalists will have to duke it out with communist China to see who will dominate the United States of America. Will it be door number 1: the Western globalists and technocrats? Or will it be door number 2: the Communist Chinese?

In either case, our national sovereignty will be surrendered to planetary governance under the auspices of the entirely corrupt United Nations and its Agenda 2030.

The inscrutable Chinese are not so inscrutable. They fully expect to dominate and rule the world by the 100th anniversary of the communist revolution in 2045. Does that surprise you? Don’t let it. The will to power has always been part of the human experience. The difference now is that cyberspace has made the world a much smaller place.

Cloward, Piven and Fauci

The fourth coup attempt was an attack on the middle class. The prolonged lockdowns were designed to create chaos, collapse the middle class, and drive the entire population into permanent cradle-to-grave dependence upon the government – socialism.

Here is the problem. Socialism is the stepping stone to communism. Total centralized government is communism, and there is no individual freedom in centralized governance. Whether it is communist Chinese or the planetary governance of globalism’s UN Agenda 2030.

Stop the coup attempt

Americans have been lulled to sleep by a false sense of security. It is time for the sleeping giant to awaken. Those on the left need to understand that there is no place for agitators in the New World Order of planetary government. You think you are resisting?? Think again. You are creating the social chaos required for the globalists to enslave you.

A one-world government under the auspices of the corrupt United Nations is a binary socio-political structure. There is the extremely wealthy political elite at the top, and the enslaved population who serve them at the bottom. Nothing exists in between. There is no middle class and no upward mobility in the feudal structure radical leftists are unwittingly helping to create.

Donald Trump survived four attempts

Against all odds, President Donald Trump survived the first four deceitful coup attempts against him. Do not let the enemies of America steal this election because it is not about one man. This election is about the sovereignty and future of the United States of America. The enemies of America will do anything and everything to defeat the existential enemy of globalism. President Trump is the unflinching obstacle to their megalomania and unquenchable will to power.

Vote for freedom in November. Do not let the fifth coup attempt against our duly elected president succeed.
