

A PETITION FROM THE PEOPLE OF NJ  
TO THE UNITED STATES GOVERNMENT ON UN-AMERICAN ACTIVITIES

November,  
2016

**Where as the People of NJ want our government to return to a lawful state and halt attacks on our culture, sovereign and Constitutional rights, denied by hateful intolerant progressives infiltrated through diversity hiring within our American institutions. We do not tacitly comply with current progressive and Un-American policies/agenda. Using mind control media tactics to create hostile factions of the electorate using mob rule to attack American values.**

The rise of hatred against American values, traditions and beliefs is at an all time high due to apathy, lack of courage, and years of policies designed to destroy our culture and rebuild it in the eyes of narcissistic equity minded haters. Because of political correctness and a lack of a pro-American policies, we now are losing our culture in all areas of life. We have witnessed wave after wave of progressive policies but were not allowed to put forth a conservative opposition. Many progressive hate machines falsely portraying themselves as civil rights groups but their agenda of social engineering our culture without the People's consent has taken it's toll. These radical progressive hate groups may have ties to activist judges that use communist political views over common law or U.S. Constitutional doctrine and these progressives must be investigated as they think the judicial branch is more powerful than the other three branches.<sup>1</sup> Some states are going after Christian and conservative groups for their biblical beliefs and totally ignoring the 1<sup>st</sup> Amendment (as well as others).<sup>2</sup> The equal powers of our three branches of government should not allow one branch (activist judges) to control the others despite previous rulings and usurping over the years, we now see corruption in our courts. In particular, the First and Second amendments have been selectively attacked when used by traditional Americans yet offered to foreign nationals, i.e. illegals cannot be questioned or asked about their status so therefore are favored unconstitutionally over Americans. This also changes our demographics without the consent of the People, but by progressive hateful fascist.<sup>3</sup> These progressive policies are putting our safety and economic future in jeopardy and using violent demonstrations to oppress others.<sup>4</sup> Is no one going to launch criminal investigations of these Un-American globalist agitators, using "mob rule" (corrupt politics or Factions) to attack Christians, males or conservatives of all races and genders?<sup>5</sup> A consorted planned attack on our heritage and culture to remove Judeo-Christian ideals ( the kicking out the YMCA, Red Cross, Prison Ministries government/private partnerships) but embracing hateful groups that are anti American/Christian like

<sup>5</sup> <http://www.constitution.org/fed/federa10.htm>

CAIR, ACLU, LaRaza University of American Women and the Southern Law Poverty Center ? Even the AFA in Connecticut was told to abandon it's Christian values just recently yet no civil rights violation investigation was launched? <sup>6</sup> Why is it in the 1960's we knew all about the progressive agenda and anti American communism but today so many Americans are ignorant as to what is going on? <sup>7</sup> There is nothing wrong with bringing back and "anti or un American committee because we now know these are needed to preserve our culture.

**"Factions"** warned to us by the founding fathers, why is this important? Because the socialist Democrats use factions to corrupt politics and create class warfare, hate and creating a polluted corrupt larger voter block of ignorant useful idiots. This war on traditional Americans cannot have happened without many years using select activist judges forcing us to comply.

Despite the outcome of the elections the intolerant left is imposing their will as they have done for decades and are stepping up their practice of mob rule and oppression using secret meetings in (NYC, DC) with George Soros, Media Matters and other anti American machines. <sup>8</sup>. We the people need help in responding to this. Isn't anyone investigation the intolerant view of our college professors, all of whom are progressives and discriminating against our conservative young people? Is not one going to investigate the media all of whom are progressives and put forth news through their biased lenses?

*Where as we the People do not tacitly comply by voting for representatives that go rogue. We present the following grievances to help reverse the cultural and political damages done to us:*

#### **List of Grievances**

- Investigate the progressive organizations for their discriminatory agenda that never supports Christian, Caucasians or all people who are conservatives and has used their organizations partnered with media and activist judges to oppress traditional conservative Americans.
- Congress is to restart a committee that investigates Un-American and Anti-American activities because we now see the progressive elitists are not fiduciary or constitutional in their actions and have a socialistic multi-cultural agenda that harms traditional Americans. Support citizens authorized through their sheriff's Office (not department) to investigate illegals who don't have more Constitutional rights than American Citizens! Using independent grand juries to investigate corruption in the courts. We are concerned that the political courts will somehow grant rights to illegals and those millions entering our country and this creates an electorate faction that opposes our founding fathers view.
- Create an oversight committee to curtail bias news and it's negative affects or civil rights violations on conservatives. There needs to be ethics and honesty in the media and creating a public database debunking news organizations exhibiting bias so the American people rate these news agencies on a bias rating.
- Investigate court outcomes that force ELL and non-English speaking rights on us. The Lau vs Nichols 1974 California case unfairly gave preference to ELL students that couldn't learn English and this created an open door to not speaking English as well as more rights to foreigners that our
